

## Summer 2023 Covid Update:

**On behalf of the Infection Prevention Team and Department Leaders we wanted to send a reminder for the Covid Protocol. (Please see the attached PDF: RAMC Healthcare Personnel Guidelines for Covid-19)**

As we move out of the public health emergency and into normalizing living with Covid, while at this time Community Levels are not in the category to mask, portions of the protocol remain here to stay for Health Care Professionals (HCP)

1. If a HCP has any symptoms of Covid, for example, headache, sore throat, fever, etc., the staff member shall make an appointment with Employee Health before returning to work. Staff may choose to have a PCR Covid test at another facility at their own expense and also provide copy of result and call employee health prior to returning to work.
2. Please contact Employee Health at: 608-768-3338 or Worksite Wellness at 608-768-3333
  - Hours of Operation: 0800-1630, Monday-Friday. Located at: 223 E. Main St. Reedsburg
  - **Testing at the Emergency Department is only for extreme situations, weekend, or holiday testing.** \*\*Employee Health is the main site for testing!\*\*

*Remember, Covid is not considered a common cold and it has not gone away. It is treated like any other communicable disease that has its own unique protocol.*

*Thank you and have a safe and fun vacation season!*
